PROFILE

Motivated Software Engineer with strong proficiency in coding, specializing in React, PHP with Laravel, Next.js, TypeScript, and Vite. Experienced in developing dynamic, user-focused web applications through academic and personal projects. Adept at problem-solving and collaborating in Agile teams to deliver innovative solutions.

WORK EXPERIENCE

Micos Computer Services

2017 - 2020

Computer Technician

I started at Micos by learning computer basics and hardware repairs, then advanced to a Computer Technician role. I handled system diagnostics, repairs, and provided technical support, delivering reliable service and maintaining strong attention to detail.

Technoville Innovation

2023 - 2025

Backend Developer

Currently working as a Backend Developer, collaborating with a team to build and deploy fully functional digital products. I've contributed to backend development, API integration, and ensuring smooth system performance across various projects.

Entrific Tech(Freelancing)

2025- Till present

Fullstack Developer

Collaborating with Entrific as a freelance developer to deliver well-coded user interfaces and fully functional websites for various clients. I focus on creating responsive designs, optimizing user experience, and ensuring performance across devices.
